

STEEL PANEL FORMS

Pool Kit Specialists

- Cost effective
- Unlimited designs
- Simple installation
- Strengthens pool
- Increases profits

Custom is Our Standard

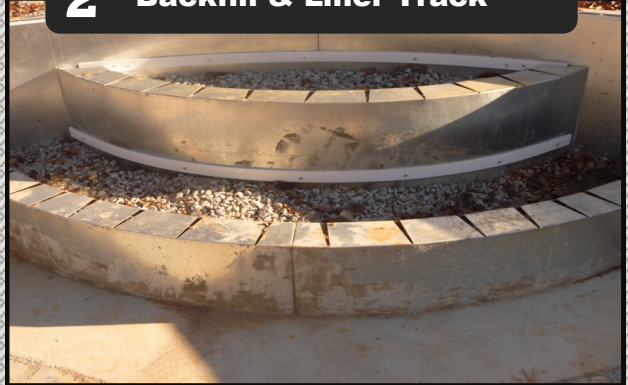

INSTALLATION PROCESS

1 Assemble Panel Forms

Fasten panel forms to perimeter panels using pre-punched bolt holes. Secure forms with drive stakes. Pour a 6" footer inside each cavity.

2 Backfill & Liner Track

Backfill with gravel, stone or sand. Leave 2" to accommodate finishing material. Face-mount liner track $\frac{1}{4}$ " higher than tread height.

3 Finish Treads & Benches

Cover liner track with tape. Finish off tops of treads and benches with concrete or grout mix.

4 Foam Treads & Benches

Tape steel-cement seams. Foam tops of treads & benches with $\frac{1}{4}$ " high density material. Optional $\frac{1}{8}$ " wall foam can be installed on risers & walls.
